Renewable Energy in District Heating and Cooling International Renewable Energy Agency (IRENA), 2017-03-04 District heating and cooling (DHC) combined with renewable energy sources can help meet rising urban energy needs, improve efficiency, reduce emissions and improve local air quality. Although currently dominated by fossil fuels such as coal and gas, DHC systems can be upgraded, or new networks created, to use solid biofuel, solar and geothermal energy technologies. Depending on local conditions, renewable-based DHC brings a range of benefits, including increased energy security, improved health and reduced climate impact. To date, only a few countries have taken advantage of their renewable resource potential for DHC or created policies to promote further uptake. Sweden and Switzerland have started promoting renewable-based district heating, while Denmark - with ambitious decarbonisation policies - already uses high shares. Many cities and regions envisage a growing role for district in their energy plans; some are also looking increasingly at district cooling. As this REmap sector study from the International Renewable Energy Agency (IRENA) shows, renewables could feasibly supply more than one fifth of the energy needed for DHC worldwide. But to drive the transition, policy makers need to fully understand the costs, benefits and actual potential for renewable-based DHC.

Sains Perubahan Iklim Putri Setiani, 2020-07-01 Buku ini terdiri atas 6 bab berisi penjelasan mengenai fenomena perubahan iklim global dan implikasinya. Bab pertama memberikan penjelasan tentang aliran energi planet bumi. Bab kedua membahas tentang gas rumah kaca yang berperan dominan dalam peningkatan temperatur rata-rata permukaan bumi, yaitu karbon dioksida (CO₂) dan metana (CH₄). Bab ketiga menjelaskan tentang kondisi fluktuasi iklim di masa lampau yang didapat dari hasil observasi terhadap batuan es. Bab keempat menyajikan kompilasi hasil penemuan para ahli terkait

perubahan-perubahan yang diobservasi selama beberapa dekade terakhir, yang mengindikasikan efek dari perubahan iklim pasca revolusi industri. Bab kelima dan keenam menjelaskan tentang upaya-upaya yang dapat dilakukan pada skala individu maupun skala global untuk memperlambat laju dampak negatif dari perubahan iklim. Selain itu, terdapat pula lampiran yang berisi contoh kasus dan cara analisisnya, serta peraturan perundang-undangan mengenai lingkungan hidup. Ditulis dengan tujuan untuk membentuk dasar kerangka berpikir dalam memahami fenomena perubahan iklim dan dampaknya, yang disusun dengan logika yang runut dan bahasa yang mudah dipahami, serta berdasarkan pada sumber-sumber ilmiah terpercaya. Buku ini, selain mampu menjadi referensi dalam mata kuliah perubahan iklim, juga diharapkan mampu mendorong berbagai pihak untuk turut berpartisipasi dalam mengurangi dampak yang mungkin terjadi akibat adanya perubahan iklim.

Smart Sustainable Cities of the Future Simon Elias Bibri, 2018-02-24 This book is intended to help explore the field of smart sustainable cities in its complexity, heterogeneity, and breadth, the many faces of a topical subject of major importance for the future that encompasses so much of modern urban life in an increasingly computerized and urbanized world. Indeed, sustainable urban development is currently at the center of debate in light of several ICT visions becoming achievable and deployable computing paradigms, and shaping the way cities will evolve in the future and thus tackle complex challenges. This book integrates computer science, data science, complexity science, sustainability science, system thinking, and urban planning and design. As such, it contains innovative computer-based and data-analytic research on smart sustainable cities as complex and dynamic systems. It provides applied theoretical contributions fostering a better understanding of such systems and the synergistic relationships between the underlying physical and informational landscapes. It offers

contributions pertaining to the ongoing development of computer-based and data science technologies for the processing, analysis, management, modeling, and simulation of big and context data and the associated applicability to urban systems that will advance different aspects of sustainability. This book seeks to explicitly bring together the smart city and sustainable city endeavors, and to focus on big data analytics and context-aware computing specifically. In doing so, it amalgamates the design concepts and planning principles of sustainable urban forms with the novel applications of ICT of ubiquitous computing to primarily advance sustainability. Its strength lies in combining big data and context-aware technologies and their novel applications for the sheer purpose of harnessing and leveraging the disruptive and synergetic effects of ICT on forms of city planning that are required for future forms of sustainable development. This is because the effects of such technologies reinforce one another as to their efforts for transforming urban life in a sustainable way by integrating data-centric and context-aware solutions for enhancing urban systems and facilitating coordination among urban domains. This timely and comprehensive book is aimed at a wide audience across science, academia industry, and policymaking. It provides the necessary material to inform relevant research communities of the state-of-the-art research and the latest development in the area of smart sustainable urban development, as well as a valuable reference for planners, designers, strategists, and ICT experts who are working towards the development and implementation of smart sustainable cities based on big data analytics and context-aware computing.

Pretext for Mass Murder John Roosa, 2006-08-03 In the early morning hours of October 1, 1965, a group calling itself the September 30th Movement kidnapped and executed six generals of the Indonesian army, including its highest commander. The group claimed that it was attempting to preempt a coup, but it was quickly defeated as the senior surviving general, Haji Mohammad Suharto, drove the movement's partisans out of Jakarta. Riding the crest of mass violence, Suharto blamed the Communist Party of Indonesia for masterminding the movement and used the emergency as a pretext for gradually eroding President Sukarno's powers and installing himself as a ruler. Imprisoning and killing hundreds of thousands of alleged communists over the next year, Suharto remade the events of October 1, 1965 into the central event of modern Indonesian history and the cornerstone of his thirty-two-year dictatorship. Despite its importance as a trigger for one

of the twentieth century's worst cases of mass violence, the September 30th Movement has remained shrouded in uncertainty. Who actually masterminded it? What did they hope to achieve? Why did they fail so miserably? And what was the movement's connection to international Cold War politics? In *Pretext for Mass Murder*, John Roosa draws on a wealth of new primary source material to suggest a solution to the mystery behind the movement and the enabling myth of Suharto's repressive regime. His book is a remarkable feat of historical investigation. Finalist, Social Sciences Book Award, the International Convention of Asian Scholars

Radical Architecture of the Future Beatrice Galilee, 2021 Architectural practice today goes far beyond the design and construction of buildings - the most exciting, forward-thinking architecture is also found in digital landscapes, art, apps, films, installations, and virtual reality. This remarkable book features projects - surprising, beautiful, outrageous, and sometimes even frightening - that break rules and shatter boundaries. In this timely book, the work of award-winning architects, designers, artists, photographers, writers, filmmakers, and researchers - all of whom synthesize and reflect our spatial environments - comes together for the first time.

Construction Methods and Planning J.R. Illingworth, 2017-12-21 This new edition of John Illingworth's popular book provides a thorough introduction to the selection of construction methods, their planning and organization on site. Thoroughly revised and updated, *Construction Methods and Planning* takes a practical, down-to-earth approach and features numerous examples and illustrations taken from real situations and sites. In Part One, the main factors which determine the planning of construction methods - site inspections, the site itself, temporary works, design, cost concepts and selection of plant and methods - are discussed. In Part Two, the application of these tools is presented, covering foundations and basements, in situ and precast concrete structures, steel frames, cladding, internal and external works, waste, methods statements, contract planning control and claims. The author provides an extension of the concept of 'buildability' and new chapters on facade retention and the refurbishment of domestic accommodation.

Alternatives in Refrigeration and Air Conditioning S. C. Kaushik, A. Arora, P. S. Bilga, 2016-04-19 Highlights the issues related to ozone layer depletion and global warming due to use of conventional cooling technologies and refrigerants in the field of Refrigeration and Air Conditioning (RAC). It describes, simulates and analyses the alternate technologies and alternate refrigerants. Unconventional refrigeration technologies are explored.

The Art of City Making Charles Landry, 2012-05-16 City-making is an art, not a formula. The skills required to re-enchant the city are far wider than the conventional ones like architecture, engineering and land-use planning. There is no simplistic, ten-point plan, but strong principles can help send good city-making on its way. The vision for 21st century cities must be to be the most imaginative cities for the world rather than in the world. This one change of word - from 'in' to 'for' -

gives city-making an ethical foundation and value base. It helps cities become places of solidarity where the relations between the individual, the group, outsiders to the city and the planet are in better alignment. Following the widespread success of *The Creative City*, this new book, aided by international case studies, explains how to reassess urban potential so that cities can strengthen their identity and adapt to the changing global terms of trade and mass migration. It explores the deeper fault-lines, paradoxes and strategic dilemmas that make creating the 'good city' so difficult.

Beyond Productivity National Research Council, Division on Engineering and Physical Sciences, Computer Science and Telecommunications Board, Committee on Information Technology and Creativity, 2003-04-02 Computer science has drawn from and contributed to many disciplines and practices since it emerged as a field in the middle of the 20th century. Those interactions, in turn, have contributed to the evolution of information technology — new forms of computing and communications, and new applications — that continue to develop from the creative interactions between computer science and other fields. *Beyond Productivity* argues that, at the beginning of the 21st century, information technology (IT) is forming a powerful alliance with creative practices in the arts and design to establish the exciting new, domain of information technology and creative practices — ITCP. There are major benefits to be gained from encouraging, supporting, and strategically investing in this domain.
